

OSM820ZCC-LAB11-Lohan vaddepally-150115236

Microsoft Azure portal showing the 'myRGCLI' resource group overview. The 'Overview' tab is selected, displaying a table of resources. The table shows three resources: 'lvaddepally' (Virtual machine), 'lvaddepally_disk1' (Disk), and 'lvaddepallyNSG' (Network security group). The 'lvaddepally' VM is in a 'stopped' state. The terminal at the bottom shows commands to stop the VM and its details.

```
odl_user [ ~ ]$ az vm show --resource-group myRGCLI --name lvaddepally --show-details --output table
Name ResourceGroup PowerState PublicIps Fqdns Location Zones
-----
lvaddepally myRGCLI VM running 40.88.11.53 eastus
odl_user [ ~ ]$ az vm stop --resource-group myRGCLI --name lvaddepally
About to power off the specified VM.
It will continue to be billed. To deallocate a VM, run: az vm deallocate.
odl_user [ ~ ]$ az vm show --resource-group myRGCLI --name <studentID>VMCLI --show-details --output table
bash: studentID: No such file or directory
odl_user [ ~ ]$ az vm show --resource-group myRGCLI --name lvaddepally --show-details --output table
Name ResourceGroup PowerState PublicIps Fqdns Location Zones
-----
lvaddepally myRGCLI VM stopped 40.88.11.53 eastus
odl_user [ ~ ]$
```

Microsoft Azure portal showing the 'myRGCLI' resource group overview. The 'Essentials' tab is selected, displaying a message: "No resources match your filters. Try changing or clearing your filters." The 'Resources' section is empty.
